OBJECTIVE

I am an M.Sc Data Science student with a strong foundation in machine learning, statistics, and data analysis. Skilled in Python, SQL, and data visualization tools. Experienced in working with real-world datasets through academic projects and internships. Passionate about solving complex problems using data-driven approaches.

EDUCATION

MASTER OF SCIENCE - DATA SCIENCE

VIT University, Vellore 2024-2026 **CGPA:7.08**

BACHELOR OF COMPUTER SCIENCE

VIT University, Vellore 2021-2024 **CGPA:7.72**

SKILLS

Languages/Tools	Python, SQL, Jupyter, Excel, Power BI, Tableau
Libraries/Frameworks	Pandas, NumPy, TensorFlow, Matplotlib
Database	MySQL, MongoDB
Concepts	Data Cleaning, Preprocessing, Modeling, Evaluation, Deployment, ML, NLP
Soft Skills	Problem-solving, Clear communication, Teamwork, Adaptability, Time management

PROJECTS

E-COMMERCE SALES WEBSITE

- Developed an e-commerce platform to facilitate online sales of sweets.
- Built a responsive e-commerce website for online sweet sales using HTML, CSS, and JavaScript.
- Designed front-end components to streamline ordering and enhance user navigation experience.
- Optimized accessibility and conversion flow for B2C operations.

MULTILINGUAL GESTURE RECOGNITION TEXT EDITOR

- Enables communication between mute people of different languages, fostering inclusion and friendship with hearing individuals
- Developed a Python-based gesture recognition text editor that converts real-time hand movements into text using MediaPipe, OpenCV, and TensorFlow
- Supports multilingual communication by displaying text in the user's native language and translating it using PyText, with a user-friendly Tkinter interface.
- Enables mute individuals from different language backgrounds to communicate easily and fosters connections between mute and hearing communities.

MACHINE LEARNING APPLICATION IN PRECISION AGRICULTURE

- Machine learning helps farmers decide when to plant, water, and harvest by analyzing weather, soil, and crop data for better yields.
- Used in crop prediction, soil mapping, irrigation control, and pest detection to increase efficiency and reduce waste.
- Ensuring data privacy and fair use is crucial for responsible and inclusive adoption of AI in agriculture.
